

**Management's Discussion and Analysis
For West Melville Metals Inc. ("West Melville" or "WM" or "the Company")**

Containing information up to and including April 27, 2016.

The following Management's Discussion and Analysis ("MD&A") should be read in conjunction with the Company's audited consolidated financial statements for the years ended December 31, 2015 and 2014 together with the notes thereto, which can be found along with other information of the Company on SEDAR at www.sedar.com. All amounts presented in this MD&A and in the audited consolidated financial statements are expressed in Canadian Dollars.

Forward Looking Statements

This MD&A provides management's analysis of West Melville's historical financial and operating results and provides estimates of West Melville's future financial and operating performance based on information currently available. Actual results will vary from estimates and the variances may be significant. Readers should be aware that historical results are not necessarily indicative of future performance.

Certain information set forth in this MD&A, including management's assessments of the Company's future plans and operations, contains forward-looking statements. By their nature, forward-looking statements are subject to numerous risks and uncertainties, some of which are beyond the Company's control, including the impact of general economic conditions, industry conditions, volatility of commodity prices, currency fluctuations, imprecision of resource and reserve estimates, environmental risks, competition from other industry participants, the lack of availability of qualified personnel or management, stock market volatility and ability to access sufficient capital from internal and external sources. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be inaccurate and, as such, undue reliance should not be placed on forward-looking statements. The Company's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur or, if any of them do so, what benefits the Company will derive therefrom. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

Overview

West Melville is an exploration stage company involved in the acquisition and exploration of resource properties. The Company is evaluating the economic potential of a deposit of iron, titanium and vanadium in Greenland. The Company does not have any producing resource properties at this time. The Company is a reporting issuer in British Columbia, Alberta, and Ontario. The Company trades on the TSX Venture Exchange under the symbol WMM.

Highlights

Exploration Update – Summary

During the year ended December 31, 2015, the Company did not conduct any significant exploration program on its property in Greenland, but incurred \$39,153 on exploration license fees and \$10,600 of laboratory work. Due to unfavourable market conditions, the Company has determined that it does not have adequate resources to conduct further exploration on the Isortoq property. Therefore, total acquisition costs of \$2,736,070 was written down to \$Nil.

The Company incurred project evaluation expenses of \$9,710 to assess potential new projects. As the Company has not yet acquired the legal rights to explore any of these potential new projects, project evaluation costs have been expensed as incurred.

Financing and Corporate

Due to the ongoing challenging markets, the Company is continuing to minimize operating expenses to conserve capital. The Company is seeking financing opportunities to further exploration activities when market conditions improve.

On May 25, 2015, the Company consolidated the Company's issued and outstanding common shares, stock options and warrants at a ratio of one new share for ten old shares. On March 2, 2016, subsequent to December 31, 2015, the Company consolidated the Company's issued and outstanding common shares, stock options and warrants at ratio of one new share for four old shares. Unless otherwise indicated, all references to share capital, stock options and share purchase warrants presented in these financial statements and notes thereto are on a post-consolidation basis. The Company undertook this consolidation of its capital to facilitate future financings.

Results of Operations

West Melville is an exploration stage enterprise and exploring its mineral interest in Greenland with the objective of identifying economically recoverable reserves and bringing the property to the extraction and processing stage. Exploration expenditures on which the Company has acquired mineral rights are capitalized in accordance with the Company's accounting policies and losses are incurred as a result of administrative and project evaluation expenses relating to the operation of the Company's business.

The key performance driver for the Company is the acquisition and exploration of prospective mineral properties.

At this time, the Company is not anticipating profit from operations in the near future as the Company is still in the process of determining whether the property being explored has economically recoverable mineral reserves. Unless the Company is able to realize profits from the production and marketing of commodities from the property in which it is exploring, the Company will report annual losses and will rely on its ability to obtain equity or debt financing to fund on-going operations.

Additional financing will be required for new exploration and promotional initiatives. Due to the inherent nature of the junior mineral exploration industry, the Company will have a continuous need to secure additional funds through the issuance of equity or debt in order to support its corporate and exploration activities.

Financial Summary for the Year Ended December 31, 2015

The Company is an exploration stage company and engages principally in the acquisition, exploration and development of resource properties. The Company capitalizes all acquisition and exploration costs on which the Company has acquired mineral rights until the property to which those costs are related is placed into production, sold, or abandoned. During the year ended December 31, 2015, a total of \$49,753 of exploration and evaluation expenditures was capitalized. However, due to unfavorable market conditions, the Company has decided not continue with the exploration of the Isortoq property and therefore, capitalized costs of \$2,736,070 were written off as at December 31, 2015. Details of the cost break-down are contained in note 5 of the consolidated financial statements.

The Company's net loss for the year ended December 31, 2015 totalled \$2,956,313 or \$0.09 per share. Total assets decreased from \$2,788,174 at December 31, 2014 to \$17,164 at December 31, 2015. The Company's cash decreased from \$59,604 at December 31, 2014 to \$2,145 at December 31, 2015.

Year ended December 31, 2015 ("2015") compared to the year ended December 31, 2014 ("2014")

The net loss for the year ended December 31, 2015 was \$2,956,313 as compared to \$3,280,918 in the preceding year. The decrease in net loss is mainly due to a decrease in personnel costs, project evaluation costs, and write-off of exploration and evaluation assets, offset by an increase in camp removal provision. Major variances are explained as follows:

- Personnel expenses have decreased from \$75,150 in 2014 to \$15,328 in 2015. The decrease was part of the Company efforts on preserving cash;
- Project evaluation costs decreased from \$69,075 in 2014 to \$9,710 in 2015. The decrease in costs was due to cost saving measures taken on by the Company;
- Camp removal provision of \$103,885 was recorded in 2015 compared to \$nil in 2014. The camp removal provision was set up in 2015 for the costs to be incurred to removal its camp on the Fraser Bay Project as it was dropped in 2014; and
- Write-off of exploration and evaluation assets was \$2,736,070 in 2015 compared with \$3,000,665 in 2014. The write-off in 2015 relates to the Isortoq Property and the write-off in 2014 relates to the Fraser Bay Project.

Three months ended December 31, 2015 ("Q4 2015") compared to the three months ended December 31, 2014 ("Q4 2014")

The net loss for the three months ended December 31, 2015 was \$18,385 as compared to \$51,760 in the three months ended December 31, 2014. The decrease in net loss is mainly due to a decrease in personnel costs, project evaluation costs, share-based compensation, offset by an increase in professional fees. Major variances are explained as follows:

- Personnel expenses have decreased from \$10,004 in Q4 2014 to \$4,500 in Q4 2015. The decrease was part of the Company efforts on preserving cash;
- Project evaluation costs decreased from \$5,297 in Q4 2014 to \$Nil in Q4 2015. The decrease in costs was due to cost saving measures taken on by the Company;
- Share-based compensation expense decreased from \$21,761 in Q4 2014 to \$Nil in Q4 2015. The decrease was due to the fact that there were no options vested during Q4 2015;
- Camp removal provision of \$103,885 was recorded in Q4 2015 compared to \$nil in Q4 2014. The camp removal provision was set up in 2015 for the costs to be incurred to removal its camp on the Fraser Bay Project as it was dropped in 2014; and
- Write-off of exploration and evaluation assets was \$2,736,070 in Q4 2015 compared with \$3,000,665 in Q4 2014. The write-off in 2015 relates to the Isortoq Property and the write-off in 2014 relates to the Fraser Bay Project.

Selected Annual Information

	As at and year ended December 31, 2015	As at and year ended December 31, 2014	As at and year ended December 31, 2013
	\$	\$	\$

Total assets	17,164	2,788,174	5,726,890

Summary of Quarterly Results

Quarterly results fluctuate depending on the timing of the granting and vesting of stock options and the incurrence of project evaluation expenses and write-off of exploration and evaluation assets.

The following table summarizes selected financial data reported by the Company for the quarter ended December 31, 2015 and the previous seven quarters.

	Dec 31, 2015	Sep 30, 2015	Jun 30, 2015	Mar 31, 2015	Dec 31, 2014*	Sep 30, 2014	Jun 30, 2014	Mar 31, 2014
Current assets	\$17,164	\$39,165	\$18,384	\$25,107	\$75,937	\$162,317	\$30,846	\$124,063
Exploration and evaluation assets	-	2,736,070	2,719,689	2,719,459	2,686,317	5,621,998	5,556,355	5,523,268
Total assets	17,164	2,775,235	2,738,073	2,767,997	2,788,174	5,812,959	5,618,569	5,681,422
Current liabilities	209,333	99,917	69,518	65,107	26,238	20,621	83,567	60,594
Share capital	9,832,270	9,832,270	9,832,270	9,832,270	9,832,270	9,719,503	9,536,182	9,536,182
Net loss	(2,853,925)	(9,007)	(34,335)	(59,046)	(3,052,163)	(42,664)	(85,826)	(100,265)
Comprehensive loss	(2,858,040)	(2,684)	(34,335)	(59,046)	(3,052,163)	(42,664)	(85,826)	(100,265)
Basic loss per share	\$ (2.17)	\$ (0.01)	\$ (0.03)	\$ (0.04)	\$ (2.32)	\$ (0.03)	\$ (0.07)	\$ (0.09)
Weighted avg. shares	1,315,137	1,315,136	1,315,136	1,315,136	1,315,136	1,257,741	1,162,021	1,159,521

*The net loss in the December 31, 2014 quarter was mainly due to the write-off of the Fraser Bay Property and the net loss in the December 31, 2015 quarter was mainly due to the write-off of the Isortoq Property.

Liquidity and Capital Resources

Year ended December 31, 2015

Cash decreased by \$57,459 during the year ended December 31, 2015 from \$59,604 at December 31, 2014 to \$2,145 at December 31, 2015.

Cash utilized in operating activities during the year ended ended December 31, 2015 was \$67,706 (2014 - \$262,700). The operating activities were mostly for corporate listing and filing fees, personnel costs, project evaluation expense and professional fees.

Cash utilized in investing activities during the year ended December 31, 2015 totalled \$49,753 (2014 - \$163,429). The investing activities were for exploration and evaluation expenditures.

Cash received in financing activities during the year ended December 31, 2015 was \$60,000 (2014 - \$300,000). During the year ended December 31, 2015, the Company received \$60,000 of loans. During the year ended December 31, 2014, the Company completed private placements for net proceeds of \$300,000.

At December 31, 2015, the Company's investment in exploration and evaluation assets aggregated \$Nil (December 31, 2014 - \$2,686,317), and equipment, net of amortization, was \$nil (December 31, 2014 - \$25,920).

At December 31, 2015, share capital of \$9,832,270 comprised of 1,315,137 issued and outstanding common shares (December 31, 2014 - \$9,832,270 comprising 1,315,137 shares outstanding). Reserves, which arises from the recognition of the estimated fair value of stock options and the issuance of common share purchase warrants were \$2,022,411 (December 31, 2014 - \$2,022,411). As a result of the net loss for the year ended December 31, 2015 of \$2,956,313 (year ended December 31, 2014 - \$3,280,918), the deficit at December 31, 2015 increased to \$12,049,058 from \$9,092,745 at December 31, 2014. Accordingly, shareholders' deficit was \$192,169 as at December 31, 2015 compared to shareholders' equity of \$2,761,936 at December 31, 2014.

At present, the Company's operations do not generate cash inflows and its financial success is dependent on management's ability to discover economically viable mineral deposits. The mineral exploration process can take many years and is subject to factors that are beyond the Company's control. See "Risks and Uncertainties".

In order to finance the Company's future exploration programs and to cover administrative and overhead expenses, the Company intends to raise money through the sale of equity instruments and may consider the optioning of its mineral property interests. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration investment, and the experience and calibre of its management. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration activities. Management believes it will be able to raise equity capital as required in the long term, but recognizes there will be risks involved that may be beyond their control.

Subsequent Event

- a) Subsequent to December 31, 2015, the Company received an additional \$30,000 of loans from lenders, including \$10,000 from a company controlled by an officer of the Company.
- b) On January 27, 2016, the Company entered into new loan agreements with the lenders whereby the Company will issue promissory notes to the lenders for the \$90,000 of loans payable. In addition, the Company has issued 90,000 bonus shares to the lenders on April 12, 2016. The new loans bear interest at 8% per annum and are repayable on or after the earlier of an event of default and January 27, 2017.
- c) On March 2, 2016, subsequent to December 31, 2015, the Company consolidated the Company's issued and outstanding common shares, stock options and warrants at ratio of one new share for four old shares.

Risks and Uncertainties

Exploration Stage Company

West Melville is engaged in the business of acquiring and exploring mineral properties with the desire of locating and developing economic deposits of minerals. Development of any future properties will only follow upon obtaining satisfactory exploration results. There can be no assurance that West Melville's existing or future exploration programs will result in the discovery of commercially viable mineral deposits. Further, there can be no assurance that even if an economic deposit of minerals is located, it can be commercially mined.

Mineral Exploration and Development

The exploration and development of minerals is highly speculative in nature and involves a high degree of financial and other risks over a significant period of time which even a combination of careful evaluation, experience and knowledge may not eliminate. While discovery of a mineral deposit or ore body may result in significant rewards, few properties which are explored are ultimately developed into producing mines. Substantial expenses are required to establish ore reserves by drilling, sampling and other techniques and to design and construct mining and processing facilities. Whether a mineral deposit will be commercially viable depends on a number of factors, including the particular attributes of the deposit (i.e. size, grade, access and proximity to infrastructure), financing costs, the cyclical nature of commodity prices and government regulations (including those relating to prices, taxes, currency controls, royalties, land tenure, land use, importing and exporting of minerals, and environmental protection). The effect of these factors or a combination thereof cannot be accurately predicted but could have an adverse impact on West Melville.

No Operating History and Financial Resources

West Melville has not achieved profitable operations and has no operating revenues and is unlikely to generate any in the foreseeable future. It anticipates obtaining sufficient financing to cover its projected funding requirements for the ensuing year. Additional funds will be required for West Melville to acquire and explore new mineral interests. West Melville has limited financial resources and there is no assurance that sufficient additional funding will be available to fulfill its obligations or for further exploration and development, on acceptable terms or at all. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and development and could cause West Melville to forfeit its interests in some or all of its properties or to reduce or terminate its operations.

Government Regulation

The current or future operations of West Melville, including exploration and development activities and the commencement and continuation of commercial production, require licenses, permits or

other approvals from various foreign federal, provincial and local governmental authorities and such operations are or will be governed by laws and regulations relating to prospecting, development, mining, production, exports, taxes, labour standards, occupational health and safety, waste disposal, toxic substances, land use, water use, environmental protection, land claims of indigenous people and other matters. There can be no assurance, however, that West Melville will obtain on reasonable terms, or at all, the permits and approvals, and the renewals thereof, which it may require for the conduct of its current or future operations or that compliance with applicable laws, regulations, permits and approvals will not have an adverse effect on any mining project which West Melville may undertake. Possible future environmental and mineral tax legislation, regulations and actions could cause additional expense, capital expenditures, restrictions and delays to West Melville's planned exploration and operations, the extent of which cannot be predicted.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions there under, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

Competition

The mineral exploration and mining business is competitive in all of its phases. West Melville will compete with numerous other companies and individuals, including competitors with greater financial, technical and other resources, in the search for and the acquisition of attractive mineral properties. West Melville's ability to acquire properties in the future will depend not only on its ability to develop its present properties, but also on its ability to select and acquire suitable prospects for mineral exploration or development. There is no assurance that West Melville will be able to compete successfully with others in acquiring such prospects.

Environmental Risks and Hazards

All phases of West Melville's operations will be subject to environmental regulation in the jurisdictions in which it intends to operate. These regulations mandate, among other things, the maintenance of air and water quality standards and land reclamation, provide for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry activities and operations. They also set forth limitations on the generation, transportation, storage and disposal of hazardous waste. A breach of such regulation may result in the imposition of fines and penalties. In addition, certain types of mining operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the viability or profitability of operations. Environmental hazards may exist on the properties in which West Melville holds interests or on properties that will be acquired which are unknown to West Melville at present and which have been caused by previous or existing owners or operators of the properties.

Commodity Prices

The price of West Melville's securities, its financial results and exploration, development and mining activities may in the future be significantly adversely affected by declines in the price of base metals. Base metals prices fluctuate widely and are affected by numerous factors beyond West Melville's control such as the sale or purchase of precious or base metals by various

dealers, central banks and financial institutions, interest rates, exchange rates, inflation or deflation, currency exchange fluctuation, global and regional supply and demand; production and consumption patterns, speculative activities, increased production due to improved mining and production methods, government regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals, environmental protection and international political and economic trends, conditions and events. The price of base metals has fluctuated widely in recent years, and future serious price declines could cause continued development of West Melville's properties to be impracticable.

Further, reserve calculations and life-of-mine plans using significantly lower precious or base minerals prices could result in material write-downs of West Melville's investment in mining properties and increased amortization, reclamation and closure charges.

In addition to adversely affecting reserve estimates and its financial condition, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

Price Volatility and Lack of Active Market

In recent years, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many public companies have experienced significant fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any quoted market for West Melville's securities will be subject to such market trends and that the value of such securities may be affected accordingly.

Key Executives

West Melville will be dependent on the services of key executives and a small number of highly skilled and experienced consultants and personnel, whose contributions to the immediate future operations of West Melville are likely to be of importance. Locating mineral deposits depends on a number of factors, not the least of which is the technical skill of the exploration personnel involved. Due to the relatively small size of West Melville, the loss of these persons or West Melville's inability to attract and retain additional highly skilled employees or consultants may adversely affect its business and future operations. West Melville does not currently carry any keyman life insurance on any of its executives. The directors and certain officers of West Melville will devote part of their time to the affairs of West Melville.

Potential Conflicts of Interest

Certain directors and officers of the Company are, and may continue to be, involved in the mining and mineral exploration industry through their direct and indirect participation in corporations, partnerships or joint ventures which are potential competitors of the Company. Situations may arise in connection with potential acquisitions in investments where the other interests of these directors and officers may conflict with the interests of the Company. Directors and officers of the Company with conflicts of interest will be subject to and will follow the procedures set out in applicable corporate and securities legislation, regulation, rules and policies.

Dividends

West Melville has no earnings or dividend record and is unlikely to pay any dividends in the foreseeable future as it intends to employ available funds for mineral exploration and development. Any future determination to pay dividends will be at the discretion of the Board of Directors of West Melville and will depend on West Melville's financial condition, results of

operations, capital requirements and such other factors as the Board of Directors of West Melville deem relevant.

Nature of the Securities

The purchase of the Company's securities involves a high degree of risk and should be undertaken only by investors whose financial resources are sufficient to enable them to assume such risks. The Company's securities should not be purchased by persons who cannot afford the possibility of the loss of their entire investment. Furthermore, an investment in the Company's securities should not constitute a major portion of an investor's portfolio.

Proposed Transactions

There are no proposed transactions that should be disclosed.

Additional Disclosure for Venture Issuers without Significant Revenue

Additional disclosure concerning West Melville's general and administrative expenses and exploration and evaluation assets is provided in the Company's Consolidated Statement of Comprehensive Loss and note 5 in its consolidated financial statements for the year ended December 31, 2015 that is available on West Melville's website at www.westmelville.com or on its SEDAR Page Site accessed through www.sedar.com.

Outstanding Share Data

West Melville's authorized capital is unlimited common shares without par value. As at April 27, 2016, the following common shares and share purchase warrants were outstanding:

	# of Shares	Exercise Price	Expiry Date
Issued and Outstanding Common Shares	1,405,137		
Share Purchase Warrants	125,115	\$ 6.00	July 29, 2017
	25,195	\$ 20.00	August 3, 2017
	28,000	\$ 6.00	August 28, 2017
Fully Diluted at April 27, 2016	<u>1,583,447</u>		

Escrowed Securities and Resale Restrictions

Under the applicable policies of the Canadian Securities Administrators and the Exchange, the common shares issued are subject to either escrow agreements or resale restrictions.

Pursuant to an escrow agreement dated February 22, 2012, the Company's directors and executive officers and certain other shareholders (collectively the "Principals") agreed to deposit in escrow the 1,035,380 common shares held by them prior to the IPO date of July 23, 2012. The escrow agreement provides that the escrowed common shares will be released from escrow as to 70% on the date which is two years from the date of listing on the TSX Venture Exchange being July 23, 2012 ("Listing Date") and the remaining securities in equal blocks of 15% at six month

intervals thereafter. In addition to the common shares deposited in escrow prior to the IPO, 100,780 Units issued subsequent to the IPO as part of the acquisition of the Isortoq property in Greenland are subject to the same escrow terms. As of December 31, 2015 and the date of this report, nil common shares (December 31, 2014 – 340,848 common shares) remained in escrow in accordance with the escrow agreement.

In addition to the hold period described above, the 1,175,000 common shares held by non-Principals are subject to resale restrictions in accordance with the policies of the Exchange, as follows: 224,500 are subject to a three year restriction with 10% released on the Listing Date and 15% every six months thereafter; 75,000 are subject to a two year restriction with 20% released on the Listing Date and 20% each six months thereafter; and 875,500 common shares subject to a four month hold period pursuant to which 20% will be released on the Listing Date and 20% each month thereafter. As of December 31, 2015 and the date of this report, nil common shares (December 31, 2014 – 67,350 common shares) remained subject to the resale restrictions.

Off Balance Sheet Arrangements

The Company does not utilize off balance sheet arrangements.

Recent Accounting Pronouncements

Recent Accounting Pronouncements not yet applied:

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC that are mandatory for future accounting periods. The Company has not early adopted any of these standards and is currently evaluating the impact, if any, that these standards might have on its financial statements.

IFRS 9 Financial Instruments (“IFRS 9”) partially replaces IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective on or after January 1, 2018.

IFRS 7 Financial Instruments - Disclosure (“IFRS 7”) has been amended to require additional disclosures on transition from IAS 39 to IFRS 9. IFRS 7 is effective on or after January 1, 2016.

IFRS 11 Accounting for Acquisitions of Interests in Joint Operations (“IFRS 11”) has been amended to provide specific guidance on accounting for the acquisition of an interest in a joint operation that is a business. IFRS is effective on or after January 1, 2016.

IFRS 16 and IAS 38 Clarification of Acceptable Methods of Depreciation and Amortization (“IFRS 16 and IAS 38”) have been amended to (i) clarify that the use of a revenue-based depreciation and amortization method is not appropriate, and (ii) provide a rebuttable presumption for intangible assets. IFRS 16 and IAS 38 are effective on or after January 1, 2016.

Contractual Obligations for the Next Five Years

The Company has no contractual obligations over the next five years.

Transactions with Related Parties

Key management personnel compensation

Key management personnel consist of the Company's directors and officers. In addition to management and consulting fees paid to these individuals, or companies controlled by these individuals, the Company provides non-cash benefits to an executive officer. The aggregate value of compensation with key management personnel for the year ended December 31, 2015 was \$35,638 (2014 - \$149,957) and was comprised of the following:

	2015	2014
Exploration expense – field work	\$ 10,600	\$ 86,400
Personnel	15,328	74,758
Project evaluation	9,710	33,200
Share-based compensation expense	-	18,304
	\$ 35,638	\$ 212,662

Related party transactions and balances not disclosed elsewhere in these financial statements are as follows:

The balance receivable from related parties at December 31, 2015 was \$Nil (December 31, 2014 - \$11,038).

The balance payable to related parties at December 31, 2015 was \$8,325 (December 31, 2014 - \$2,137) and is included in accounts payable and accrued liabilities. These payables are unsecured, non-interest bearing and are expected to be repaid under normal trade terms.

During the year ended December 31, 2015, the Company received a total of \$20,000 in loans from a company controlled by an officer of the Company.

The amounts charged to the Company for the services provided have been determined by negotiation among the parties and, in certain cases, are covered by signed agreements. These transactions were in the normal course of operations and were measured at the exchange value, which represented the amount of consideration established and agreed to by the related parties.

Recent Developments and Outlook

The Company expects to obtain financing in the future primarily through further equity financing, as well as through joint venturing and/or the optioning of the Company's properties to qualified mineral exploration companies. There can be no assurance that the Company will succeed in obtaining additional financing, now or in the future. Failure to raise additional financing on a timely basis could cause the Company to suspend its operations.

The Company's business objectives are to secure financing, fund its general and administrative expenses for the ensuing year, to search for a new propperty, and fund its working capital requirements.

Financial Instruments and Other Instruments

Overview

The Company has exposure to credit risk, liquidity risk and market risk from its use of financial instruments.

The following presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and GST recoverable. Cash is held with a major Canadian financial institution and GST recoverable are from Government entities. Management is of the view that all amounts are fully collectible.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations and commitments as they become due. The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account cash flows from operations and the Company's holdings of cash and cash equivalents. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. Management believes that the Company has sufficient funds to meet its obligations as they become due or will be able to obtain financing as required to meet its obligations and commitments. Also see note 1 of the Company's financial statements for the year ended December 31, 2015.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. The Company does not currently have any significant interest or equity price risk as it has no significant interest bearing financial instruments nor does it hold any investments in equities of another entity.

Foreign currency risk

In the normal course of business, the Company enters into transactions for the purchase of supplies and services and acquisition of mineral properties, denominated in a currency other than the functional currency of the Company. As a result, the Company is subject to foreign exchange risk from fluctuations in foreign exchange rates. The Company has not entered into any derivative or other financial instruments to mitigate this foreign exchange risk. The Company does not have any significant currency risks at December 31, 2015.

Approval

The Board of Directors of West Melville has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone upon request.
