K2 Gold Corporation

(An Exploration Stage Company)

Notes to the Condensed Interim Consolidated Financial Statements

For the Six Months Ended June 30, 2020 and 2019

(Amounts are expressed in Canadian Dollars)

1. Nature of Operations and Going Concern

K2 Gold Corporation ("K2 Gold" or the "Company") was incorporated on May 3, 2011, pursuant to the Business Corporations Act of British Columbia, Canada. The Company's head office is located at Suite 1020 – 800 West Pender St., Vancouver, BC, V6C 2V6. The Company's common shares are publicly listed on the Toronto Stock Exchange's Venture Exchange (the "Exchange") under the symbol "KTO".

K2 Gold is an exploration stage company with its primary focus being the exploration of mineral properties in California, the Yukon Territory, and Alaska.

The recoverability of amounts shown as mineral property interests is dependent upon the discovery of economically recoverable reserves, the Company's ability to obtain financing to develop its property and the ultimate realization of profits through future production or sale of its property. Realized values may be substantially different than carrying values as recorded in these consolidated financial statements.

These condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to continue its operation as a going concern for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. At June 30, 2020, the Company had not achieved profitable operations and had an accumulated deficit. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern. These condensed interim consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

Although the Company has been successful in the past in obtaining financing, there can be no assurances that the Company will continue to obtain the additional financial resources necessary and/or achieve profitability or positive cash flows from its future operations. If the Company is unable to obtain adequate additional financing, the Company would be required to curtail its planned operations, exploration and development activities.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

2. Basis of Presentation

a) Statement of Compliance

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") for interim information, specifically International Accounting Standards ("IAS") 34 - Interim Financial Reporting. In addition, these interim financial statements have been prepared using interpretations issued by the International Financial Reporting Interpretation Committee ("IFRIC") in effect at June 30, 2020 and the same accounting policies and methods of their application as the most recent annual financial statements of the Company. These interim financial statements do not include all disclosures normally provided in the annual financial statements and should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2019. In management's opinion, all adjustments necessary for fair presentation have been included in these condensed interim financial statements. Interim results are not necessarily indicative of the results expected for the year ending December 31, 2020.

b) Approval of the consolidated financial statements

These condensed interim consolidated financial statements were approved and authorized for issue by the Board of Directors on August 14, 2020.

2. Basis of Presentation (continued)

c) Functional and Presentation Currency

The functional currency of a company is the currency of the primary economic environment in which the company operates. The presentation currency for a company is the currency in which the company chooses to present its consolidated financial statements.

These condensed interim consolidated financial statements are presented in Canadian dollars, which is the Company's presentation and functional currency.

Transactions in foreign currencies are translated into the functional currency at exchange rates as at the date of the transaction. Foreign currency differences arising on translation are recognized in profit or loss. Foreign currency monetary assets and liabilities are translated at the functional currency exchange rate at the date of the statement of financial position. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using exchange rates as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates as at the date of acquisition. All gains and losses on translation of these foreign currency transactions are included in profit or loss.

d) Basis of consolidation:

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiary K2 Gold Alaska, Inc. ("K2 Gold Alaska"). The financial statements of K2 Gold Alaska are included in the consolidated financial statements from the date on which control was transferred to the Company. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. All significant intercompany accounts and transactions have been eliminated on consolidation.

3. Significant Accounting Policies

Critical accounting judgments, estimates and assumptions

The preparation of these condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amount of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates that, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods.

These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Information about significant areas of estimation uncertainty in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are noted below with further details of the assumptions contained in the relevant note.

The preparation of these condensed interim consolidated financial statements requires management to make judgments regarding the going concern of the Company as discussed in Note 1.

Key sources of estimation uncertainty

Exploration and evaluation assets

Exploration and evaluation costs are initially capitalized as intangible exploration assets with the intent to establish commercially viable reserves. The Company is required to make estimates and judgments about the future events

(An Exploration Stage Company)

3. Significant Accounting Policies (continued)

and circumstances regarding whether the carrying amount of intangible exploration assets exceeds its recoverable amount.

Recoverability is dependent on various factors, including the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development and upon future profitable production or proceeds from the disposition of the exploration and evaluation assets themselves. Additionally, there are numerous geological, economic, environmental and regulatory factors and uncertainties that could impact management's assessment as to the overall viability of its properties or the ability to generate future cash flows necessary to cover or exceed the carrying value of the Company's exploration and evaluation assets.

Deferred tax assets and liabilities

The measurement of a deferred tax provision is subject to uncertainty associated with the timing of future events and changes in legislation, tax rates and interpretations by tax authorities. The estimation of taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized.

The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future tax provisions or recoveries could be affected.

Share-based compensation

Share-based compensation expense is measured by reference to the fair value of the stock options at the date at which they are granted. Estimating fair value for granted stock options requires determining the most appropriate valuation model which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the option, volatility, dividend yield, and rate of forfeitures and making assumptions about them.

New and revised standards and interpretations

The accounting policies in preparation of these condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company's audited consolidated financial statements for the year ended December 31, 2019.

4. Marketable Securities

On June 17, 2015, the Company entered into a debt settlement agreement with Bluestone Resources Inc. ("Bluestone") whereby Bluestone issued 220,765 of its shares to settle the debt of \$11,038 owing to the Company.

The shares were issued on July 20, 2015. The Bluestone shares were consolidated on the basis of one (1) new post-consolidation share for every five (5) pre-consolidation shares, effective May 24, 2017. As a result of this consolidation, K2 Gold Corporation owns 44,153 common shares in Bluestone Resources Inc.

The fair value of these common shares as at July 20, 2015, the date of the receipt of Bluestone shares, was \$11,038. All of these common shares were sold during quarter 1, 2020, resulting in total net proceeds of 73,681 and a realized gain of 62,643

5. Exploration and Evaluation Assets (continued)

In addition, following the exercise of its option, K2 has agreed to make an annual pre-production payment of US\$275,000 per year until the achievement of commercial production and to grant a 3% NSR with respect to all mineral produced from the Mojave Project, subject to a minimum annual royalty payment following commercial production of US\$300,000. The royalty will be subject to certain buy-down rights in K2's favour. K2 may terminate the Agreement at any time during the option period.

Subsequent to the signing of the option agreement, the Company paid \$127,813 (US\$ 96,089) for land taxes and \$31,410 (US\$ 23,586) for legal fees pursuant to Mojave's option agreement. The Company completed the first cash option payment of \$150,244 (US\$ 112,500) and issued 480,000 common shares at a price of \$0.325 pursuant to Mojave's option agreement with a fair value of \$156,000. In connection with the Mojave Project agreement, the Company issued 212,764 common shares at a price of \$0.325 with a fair value of \$69,148 as finders' fees (Note 6). In the first quarter of fiscal 2020 the Company completed the second cash option payment of \$147,139 (US\$ 112,500) pursuant to Mojave's option agreement. Subsequent to quarter two end, the Company completed the third cash option payment of \$169,825 (US\$125,000) and issued 480,000 common shares at a price of \$0.51 pursuant to Mojave's option agreement with a fair value of \$244,800.

Wels Property

The Company signed a definitive option agreement with Go Metals Corp. "Go Metals" (formerly "Go Cobalt Mining Corp.") on August 11, 2016, subsequently amended October 21, 2016 option, to acquire a 90% joint venture interest (subject an existing 3% net smelter return) in certain mineral property interests located in the Yukon Territory, known as the "Wels Property". According to the agreement, to earn its interest, the Company made cash payments aggregating \$350,000 staged over 24 months and issued 3 million common shares staged over a 30-month period as follows:

	Cash option payments		Common shares issuance	
Within 5 days after date of October 16, 2016	\$	50,000 (paid)	500,000	(issued)

* Upon completion of the payments and share issuances, the Company and Go Metals will proceed under the terms of a joint venture agreement (the "Joint Venture"). Under the Joint Venture, the Company will fund the project fully through completion of a preliminary economic assessment, following which project expenditures will be funded on a 90/10 proportionate basis between the Company and Go Metals, respectively, with the Company acting as project manager and holding voting control of the Joint Venture project committee. If, at any time, either party's Joint Venture interest is diluted to less than 1% that diluted party's interest will be cancelled, and the Joint Venture will terminate.

The Wels property is subject to 3% net smelter return ("NSR") governed by a 2011 agreement between Go Metals and two arm's length holders. The royalty agreement provides that 2% of the 3% NSR may be purchased from the royalty holders for cash payment of \$1,500,000. Pursuant to the Option Agreement, the Company will pay the \$20,000 annual advance royalty due under the 2011 agreement. Pursuant to the option agreement a \$20,000 annual advance royalty was paid in 2019 (2018 - \$20,000).

During the year ended December 31, 2019, the Company issued 500,000 common shares at a price of \$0.255 to Go Metals pursuant to the Wels option agreement. The fair value of these common shares was \$127,500 as at the time of their issuance (Note 6). The Company has now satisfied all of the terms of its option agreement with Go Metals and earned a 90% interest in the Wels property.

7. Financial Instruments

a) Fair values

The Company has classified fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of inputs used in making the measurements as follows:

- Level 1: Valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Valuations based on directly or indirectly observable inputs in active markets for similar assets or liabilities, other than Level 1 prices, such as quoted interest or currency exchange rates; and
- Level 3: Valuations based on significant inputs that are not derived from observable market data, such as discounted cash flow methodologies based on internal cash flow forecasts.

The fair value of cash and cash equivalents, amounts receivable and accounts payables and accrued liabilities approximates their carrying value due to their short-term maturity. Marketable securities are measured using level one of the fair value hierarchy.

b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and cash equivalents and amounts receivable.

Cash and cash equivalents are held with major Canadian financial institutions and amounts receivable primarily consist of GST recoverable are from Government entities. Management is of the view that all amounts are fully collectible.

c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations and commitments as they become due. The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account cash flows from operations and the Company's holdings of cash. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. Management believes that the Company has sufficient funds to meet its obligations as they become due or will be able to obtain financing as required to meet its obligations and commitments (see also Note 1).

7. Financial Instruments (continued)

d) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and commodity and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Investments in equity instruments which are classified as fair value through other comprehensive income and are measured at fair value, are listed on public stock exchanges, including TSX-V and OTC-QB. All equity instruments were sold during quarter 1, 2020.

In the normal course of business, the Company enters into transactions for the purchase of supplies and services and acquisition of mineral properties, denominated in a currency other than the functional currency of the Company. As a result, the Company is subject to foreign exchange risk from fluctuations in foreign exchange rates, however Management estimates the risk to be insignificant. The Company has not entered into any derivative or other financial instruments to mitigate this foreign exchange risk.

e) Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern so that it can provide returns and benefits for shareholders and advance the exploration of its mineral properties.

The Company's policy is to maintain a strong capital base to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, comprising share capital and reserves, net of accumulated deficit.

The Company depends on external financing to fund its activities and may issue new equity instruments to maintain its capital structure. The Company manages its capital structure through the preparation of operating budgets, which are approved by the Board of Directors.

In June of 2020 the Company received the \$40,000 interest free Canada Emergency Business Account (CEBA) loan. The program is operated by the Government of Canada. If the loan balance is paid on or before December 31, 2022, there will be loan forgiveness of 25%/\$10,000.

There were no changes in the Company's approach to capital management during the period ended June 30, 2020. The Company is not subject to any externally imposed capital requirements.
